 Procedure 2

Insight Upgrade Procedure to v18

Introduction

This document covers how to upgrade insight to version 18 from version 17. Version 18 has new features to support the CEL-620 enhanced model, as well as newer versions of software subcomponents to ensure compatibility with current and future Windows versions. As such, v18 installs as a separate software package to v17. Once v18 is installed, a separate data migration tool will allow you to take all the measurements data from v17 to v18.

Upgrade Procedure to v18

Casella Insight Version 18 can be found at the following link:

https://www.casellasolutions.com/product_support/software/insight/currentsoftware.html

NOTE: If Insight is already installed **DO NOT** uninstall the current version as you will need to migrate data from v17.

1. Download the Casella Version 18 zip file from the Insight page of the Product Support section on the Casella Website (link provided above).
2. Unzip the downloaded zip file.
3. Run the setup application.

ISSetupPrerequisites	File folder		
0x0409	Configuration settings	5 KB	No
Autorun	Setup Information	1 KB	No
Casella Insight 2022	Windows Installer Package	141,767 KB	No
Data1	Cabinet File	284,389 KB	No
ISSetup.dll	Application extension	2,168 KB	No
setup	Application	494 KB	No
Setup	Configuration settings	2 KB	No

4. Follow the onscreen prompts.
5. The installation will take several minutes as the database will be upgraded during this process.
6. Confirm the installation of any additional drivers during the installation process.
7. Finish the installation.
8. Open the new version of Insight, labelled Insight 2022 as a desktop icon.

NOTE: **DO NOT** uninstall v17 of insight until you have migrated data to v18

Migrating Data from Insight v17 to v18

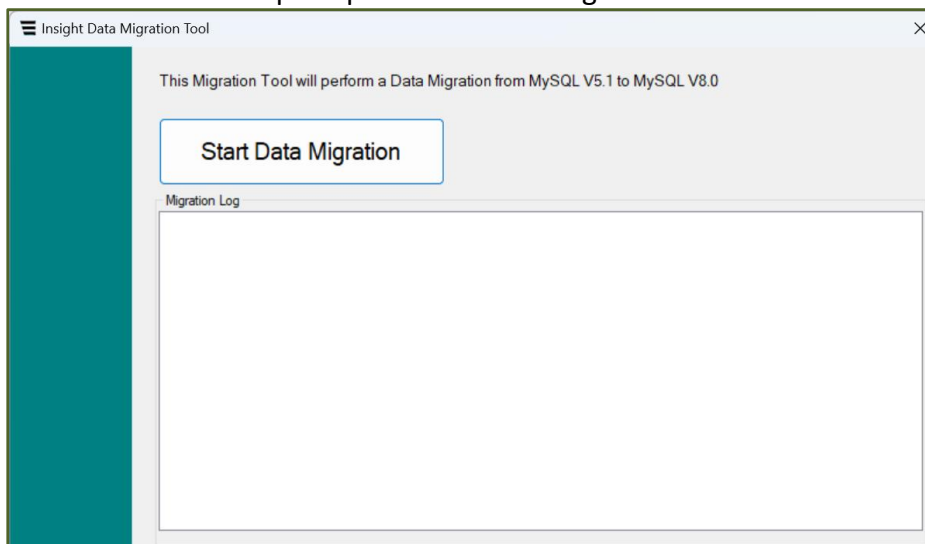

Casella Insight Data Migration Tool can be found at the following link:

https://www.casellasolutions.com/product_support/software/insight/currentsoftware.html

1. Download the Casella Insight Data Migration Tool zip file from the Insight page of the Product Support section on the Casella Website (link provided above).
2. Unzip the downloaded zip file.
3. Run the application file shown below.

DBScripts	File folder		
MySQLData5	File folder		
MySQLData8	File folder		
BouncyCastle.Crypto.dll	Application extension	808 KB	No
CreateProcUDF	Application	9 KB	No
DataOperationMySQL5.dll	Application extension	5 KB	No
DataOperationMySQL8.dll	Application extension	5 KB	No
Google.Protobuf.dll	Application extension	145 KB	No
InsightDataMigrationTool	Application	9 KB	No
InsightDataMigrationTool.exe.config	CONFIG File	1 KB	No
K4os.Compression.LZ4.dll	Application extension	22 KB	No
K4os.Compression.LZ4.Streams.dll	Application extension	14 KB	No
K4os.Hash.xxHash.dll	Application extension	6 KB	No
logFile	Text Document	1 KB	No
MySQL.Data.dll	Application extension	555 KB	No
System.Buffers.dll	Application extension	12 KB	No
System.Memory.dll	Application extension	57 KB	No
System.Numerics.Vectors.dll	Application extension	32 KB	No
Ubiety.Dns.Core.dll	Application extension	23 KB	No
ZstdNet.dll	Application extension	13 KB	No

4. Follow the onscreen prompt to start data migration.

5. The migration will take several minutes.
6. Open the new version of Insight and the migrated data will be available.

If technical issues or errors arise during the installation or data migration process please contact Casella Technical Support using the following link or by emailing techsupport@casellasolutions.com:
